

LNSSM Architecture — 99-Quantile Probabilistic Forecasting Pipeline

Key Innovations:

- 1. SSM: Linear-time selective scan
- 2. LNN Gate: Input-dependent time-constant modulation
- 3. Joint 99-Q decoder: No quantile crossing

Batch: 48-64
Total Params: ~412K
Inference: ~5ms/win

Liquid-Gated Selective SSM Block x 2 (parallel scan, $O(L)$ complexity)
